Solutions

Secure Enterprise Messaging App (Alert)

A secure, two-way communication system designed for sharing information between team members, particularly in regulated environments dealing with critical or protected information (healthcare, financial etc.).

Customer Outreach (Reach)

A quick and seamless way to send reminders, updates, informational messages and other notifications to any defined internal or external list of recipients via SMS/MMS, voice call or email.

Family Update (Status)

Medical emergencies can separate patients from family and others involved in their care. Using Mutare Text automated status update capabilities, care providers can provide continual assurance to family members on their loved-one's well-being while reducing staff interruptions.

Enterprise Text (Engage)

Enable individuals or teams within the organization to interact in two-way text conversations through a web-based interface or mobile client without exposing their personal phone numbers. Agent can pivot conversation to encrypted secure mode when health, financial, or other sensitive information is involved.

Mass Notification (Cast)

Take charge in a crisis. Quickly send critical alerts and updates to targeted groups within your organization. Includes two-way message acknowledgment assuring your messages reach their intended recipients as well as a "quick launch" rapid broadcast capability using a single click for time-critical messages and alerts.

Secure, time-sensitive, collaborative mobile messaging.

Deliver time-sensitive alerts to your key audiences.
