

# Envisioning for Teams Meeting Rooms

Tailored support through our Envisioning for Teams Meeting Rooms consultative solution

As a leader in IT, your organization's productivity may depend on a positive experience during a Teams proof of concept. You might be struggling to determine the best way to get started or, if you already have an implementation underway, your concern could be how to ensure strong user adoption. No matter your challenges, Carousel's proven success deploying collaboration solutions in multi-vendor environments and our full-stack IT capabilities can help you chart a path forward with clarity and confidence.

## YOUR CHALLENGES

- Understanding how to use the latest Microsoft Teams Rooms tools
- Juggling new technology deployments with ongoing maintenance and support of your existing IT systems
- Maximizing ROI from your technology investments
- Confusion about interoperability and meeting continuity across cloud services (Webex, Zoom, Google)
- Complexity of integrating Teams with O365, existing A/V hardware/software, supporting tools and technologies, and the rest of your IT stack
- Trialing Microsoft Teams Rooms hardware without purchase pressure

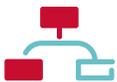

## PROGRAM BENEFITS

Microsoft Subject Matter Expert (SME) leads a hybrid 2.5-day Envisioning workshop (half-day onsite with ongoing remote consultation support)

- Microsoft Subject Matter Expert (SME) leads a hybrid 2.5-day Envisioning workshop (half-day onsite with ongoing remote consultation support)
- Assistance defining stakeholders, needs, and expectations
- Support mapping business values to define the use cases for success
- Environmental analysis resulting in appropriate device specification
- Competitive analysis of Microsoft Teams Rooms solutions in conjunction with a proof of concept

Carousel is a Microsoft Gold partner with deep experience integrating multi-vendor environments, and our technical experts can provide you with the guidance you need to make informed choices about your collaboration tools. We'll work with you to assess your use cases and deliver a comprehensive solution recommendation so you can move forward with confidence.
