About Yealink

Yealink is a global leading unified communication (UC) terminal solution provider that primarily offers video conferencing systems and voice communication solutions.

Founded in 2001, Yealink leverages its independent research and development and innovation to pursue its core mission: "Easy collaboration, high productivity." The company's high-quality UC terminal solutions enhance the work efficiency and competitive advantages of its customers in over 100 countries. Yealink is now the global No. 1 in SIP phone shipments.

# Partnership with Zoom

Oded Gal-Chief Product Officer

"While Zoom is flexible and powerful enough for large conference and training rooms, we have seen the prevalence of smaller huddle rooms in recent years, and we know that most of these spaces are woefully unequipped to handle the needs of today's workforce. By working together with Yealink, we can empower more teams with collaboration spaces that are enabled with video, audio, and screen sharing."

Stone Lu-Yealink's Vice President

"Our full range of videoconferencing solutions have achieved Zoom compatibility, and now we are excited to see our cooperation with Zoom deepen with this new joint solution. Video collaboration is unquestionably one of the most effective tools to enhance business productivity but it's not a tool reserved for large enterprises. We are making video collaboration accessible for everyone. The joint solution is just a beginning and we look forward to further cooperation with Zoom."

Yealink Audio Conference Phones

Conferencing is a rapidly growing market and efficient communication and collaboration is critical to business success. The number of units sold within the tabletop conferencing market is predicted to grow 12.9% and the VoIP segment is expected to growth 12.7% annually, according to 2017 Frost & Sullivan report.

Yealink designs its audio conferencing solution to suit range of different meeting environments. The CP960, the CP920 and the CP930W address today's audio conferencing challenges and unify a clear-and easy conferencing communication experience for both in-room and remote participants.
