

Create A High-Performance, Secure Hybrid Work Experience with NWN Carousel's Secure Hybrid Work Assessment

Changing Cybersecurity Landscape in 2023

In a distributed workforce, it's difficult to protect an organization's assets and ensure compliance with security regulations. It's also increasingly challenging to protect your on-prem and cloud security perimeters while balancing a talent shortage.

In the modern threat landscape with bad actors doubling down on identity compromise, cyberattacks are costly with vulnerabilities all too common. A well-designed **Secure Hybrid Work architecture** provides you with a solid foundation upon which your employees can securely conduct their work, regardless of their location or device, in a consistent fashion, ensuring the employee experience is not only secure, but also fosters productivity.

NWN Carousel's Secure Hybrid Work (SHW) Assessment helps to clearly define what your secure hybrid architecture requirements are, but also educates you on the components of that architecture and assesses your current posture relative to that desired standard. Additionally, a prioritized roadmap of initiatives necessary to improve that posture is provided.

The **SHW Assessment** helps you to quickly evaluate your organization's cybersecurity status and to create a fact-based action plan to improve security.

Our Approach to a SHW Assessment

NWN Carousel's fixed-price, 5-phase **SHW Assessment** provides our extensive expertise in assessing your Secure Hybrid Work posture via onsite education and discovery, findings documentation and review, and a prioritized roadmap of initiatives designed to improve your Secure Hybrid Work posture while also ensuring employee productivity isn't hampered by security.

Outcome: A prioritized roadmap of advancements will position you to gain business support to further enhance your hybrid work posture and broad security plan.

Benefits of a SHW Assessment

- **Education on Hybrid Work** security architecture and assessment of current posture
- **Understand what opportunities & challenges exist** in today's market and in your environments
- **Prioritized roadmap of advancements** to gain support to improve secure hybrid work

5 Steps to a Secure Hybrid Work Assessment

- 1. Initial Scope and Stakeholder Identification** – It's critical that the necessary stakeholders are identified and committed to the process in order for the assessment to be effective. A kickoff of the effort will involve gaining consensus on scope and stakeholder commitment.
- 2. Pre-visit Questionnaire** – In efforts to best streamline the process and prepare for engagement onsite a list of questions will be addressed to identified stakeholders as a jumping-off point for the On-site engagement to follow
- 3. On-site Education and Discovery** – NWN Carousel will spend a day with your stakeholders to educate on Secure Hybrid Work architectures while also conducting a discovery of your current posture.
- 4. Compilation of Findings and Recommendations** – NWN Carousel's consulting team process findings and create a structured deliverable.
- 5. Findings Review and Prioritization** – NWN Carousel's consulting team will meet with your stakeholders to review the findings and facilitate prioritization of a roadmap.

“NWN Carousel helped Foxwoods Resorts Casino implement a cloud security strategy to reduce risk from increasingly sophisticated, modern-day cyber threats.”

Mike McCann, Network Manager, Information Services, Foxwoods Resorts Casino

CX, Analytics, and Automation Join Security as Top Technology Spending Drivers

Behind the persistent need for security investments, IT leaders are also driven to support spending for business transformation initiatives.
